## **Fact Sheet: Nita PRO-Less Stacker**

Designed for the manipulation of processless plates, the PRO-Less plate stacker not only automates the digital plate making process, but also eliminates manipulation of the plates that can result in plate handling problems like kinks and scratches. With no processor required, the PRO-Less stacker joins directly to the back of the CTP device and stacks 85-100 plates automatically, depending on gauge.

The Nita PRO-Less plate stacker is easy to use and features plug-and-play installation. It's small footprint, heavy-duty construction and adjustable height make it adaptable to virtually any workspace.

### **Nita PRO-Less Plate Stacker Features & Benefits**

- Variable belt speed, stacking 85-100 plates per hour (40 plates per hour performance)
- Adaptable to any CTP device
- Plug-and-play installation
- Small footprint
- Variable belt speed and skid belts for smooth transition
- Heavy-duty construction
- Virtually maintenance free
- Available in 36" and 48" widths
- Multiple positions of fork locations
- Landscape or portrait manipulation
