Graph Expo 2008 – Booth #4404

Fact Sheet:

CGS ORIS Color Tuner Web 6.0

Newly released ORIS Color Tuner Web 6.0 is now web-based application, still using the award-winning core ORIS Color Tuner iterative color management and control system. The new system offers additional automation and new friendly look and design.

The software features improved handling of packaging as well as an improved halftone dot structure and screening capability. A new drag-and-drop feature allows files to be put into the proofing queue from a remote location and built-in soft proofing software provides for a hybrid proofing workflow and enhanced flexibility.

An enhanced GUI offers a user-friendly design, with eye-popping graphics, all in an automated system that is both open and connected.

CGS ORIS Color Tuner Web 6.0 Features & Benefits

- Significantly lower cost-per-proof compared to other proofing options
- Consistently accurate color, using ORIS' exclusive fine tuning, AutoCal™, qualified ink and proofing papers
- High-speed, efficient throughput, reducing the amount of valuable time spent on proofing
- Lower integration costs, thanks to ORIS' compatibility with major workflow systems and digital file formats
- Lower labor costs because of ORIS' Setup Wizard and automatic device calibration, which can be done quickly – even by non-color experts
- New business opportunities, made possible by ORIS' support for Hexachrome® and custom color proofing
