Fact Sheet: Rampage v11.0 Software

A proven solution with a large installed base of customers, Rampage continues to be a reliable solution with v11.0 of its popular workflow system. Rampage has consistently delivered innovative features to the market and their service and support is unmatched in the industry. With Rampage v11.0 and its standards-based open architecture, users are able to implement a system that reduces labor and material costs, and can grow as needs change or new technologies become available.

Rampage v11.0 fully supports the latest JDF standard, with MIS integration and JDF imposition options – including complete Metrix integration providing up to 100 percent automation. With more than 100 interfaces, Rampage protects existing investments while giving users the freedom to add other output devices at a later date.

Rampage v11.0 Features & Benefits

- **New v11.0 PDF Trap Engine** – Provides three times faster processing on quad-core and 5.3 times faster on dual quad-core with threaded RIPs.
- **New v11.0 Threaded RIP** – Allows two load-balanced RIPs on a single dual quad-core platform.
- **New v11.0 Softproof Compare** – Highlights any difference between revised files.
- **New v11.0 De-Impose** – Allows fully imposed flats to be de-imposed and run on two-up printers while maintaining all imposition settings.
- **Fujifilm Taskero Universe integration** – Allows Taskero Universe and Rampage to communicate job status and approval information, helping printers operate with optimum efficiency.
- **Low-res Fujifilm TIFF Out option** – This option will provide a rapid, reliable file format for Fujifilm/Rampage users utilizing the benefits of CGS Color Tuner proofing on ink jet devices.
- **Rampage to Xerox Fiery RIP shooter** – Provides an interface to many Xerox DocuColor digital presses.
