Graph Expo 2008 – Booth #4404

Fact Sheet:

Screen Truepress Jet2500UV

The Truepress Jet2500UV is a versatile grand-format inkjet printing system designed for markets that demand high-quality, high-speed printing. Compatible with substrates and applications ranging from point-of-purchase materials to posters, banners and textiles, the Truepress Jet2500UV is poised to revolutionize the grand-format sign and display market.

The Truepress Jet2500UV offers the perfect balance of speed, quality and productivity on diverse substrates up to 1.9" thick and 98.4" wide. It achieves output speeds up to 726.5 sq. ft. per hour, making it one of the fastest high-level digital printers.

The Truepress Jet2500UV uses a grayscale head with eight levels. It comes standard with four process colors and is optionally available for printing up to seven colors, including a pre-white function. UV-curable inks make it possible to print on a wide variety of substrates with consistent color and quality. It offers high resolution, up to 1,500 dpi.

Screen Truepress Jet 2500UV Features & Benefits

- **Image Quality**
 - High-precision output with a maximum resolution of 1,500 dpi
 - Multi-level grayscale print head enables output of smooth gradations
 - Unique screening algorithms to optimize output quality
- **Productivity**
 - High-speed printing at up to 726.5 sq. ft. per hour
 - Uses fast-drying UV-cured inks that improve production and shorten turnaround time
 - Compatible with a variety of board, roll and sheet media
- **Reliability**
 - Head control uses linear motor drive and linear scale
 - Vacuum ensures media is fixed properly
 - Auto cleaning function maintains optimal condition of inkjet print heads
