Graph Expo 2008 – Booth #4404

Fact Sheet:

Fujifilm Vybrant Series of Solvent Printers

The Vybrant series of solvent-based printers from Fujifilm delivers high quality output with vibrant color at rapid production speeds, making it one of the most cost-effective and reliable roll-to-roll solutions on the market today. The Fujifilm Vybrant is available in three sizes: 1.9m, 2.6m and 3.3m.

The Fujifilm Dimatix Spectra® 256-nozzle print heads were developed for heavy production runs across a wide variety of graphic applications. Dual heating elements enable exceptionally quick startup and faster production speeds. It has a self-cleaning system, which reduces operator maintenance time and increases uptime and throughput.

The Fujifilm Vybrant features a fully motorized, heavy-duty media unwinding/winding system, capable of handling media in excess of 300 pounds for hours of trouble-free, unattended printing.

Fujifilm Vybrant Series Features & Benefits

- Automatic head height adjustment allows multiple media compatibility, up to 4.5mm
- Variable pressure rollers accept a wide range of flexible material, even as thin as 1mm, and more than 10 feet wide
- Production speeds of up to 800 sq. ft. per hour
